Quick setup — if you've done this kind of thing before

| ⬇ Set up in Desktop | or | HTTPS | SSH | https://github.com/warunee01/sunday-website. | 🗐 |

Get started by creating a new file or uploading an existing file. We recommend every repository include a README, LICENSE, and .gitignore.

...or create a new repository on the command line

```
echo "# sunday-website" >> README.md
git init
git add README.md              git add . (Enter)
git commit -m "first commit"   File  File  upload
git branch -M main
git remote add origin https://github.com/warunee01/sunday-website.git
git push -u origin main        Upload  folder
```

...or push an existing repository from the command line

```
git remote add origin https://github.com/warunee01/sunday-website.git
git branch -M main
git push -u origin main
```

...or import code from another repository

You can initialize this repository with code from a Subversion, Mercurial, or TFS project.

Import code

💡 **ProTip!** Use the URL for this page when adding GitHub as a remote.
